Open Broadcaster Software Screen Capture Mac

Jul 12, 2020 OBS Tutorial: Open Broadcaster Software - Screencast/Video Screen Capture (OBS Studio/Multiplatform) - Duration: 6:36.. TanUv90 65,583 views Open Broadcaster Software (OBS) is a rare gem in the world of screen recording and streaming.. When combined with solid audio and video editing software it is a powerful and flexible screencast video production tool.. Besides being free and open source, it works the same across all desktop platforms.. It's free, open source, and fully cross-platform — Mac, Windows and Linux High quality dvd burning software for mac.. OBS is probably used most often for live streaming Other apps with similar streaming features can be filtered with the live-streaming tag or with the live-broadcasting.. Open Broadcaster Software Studio, more commonly known as OBS, is a video streaming and recording program.
